ULV Fogger/Misting Machine to Spray Disinfectant

Mains and Battery fogging machines to spray disinfectant

The foggers have optional auto spray timer function.

All foggers have adjustable flow regulator, providing the required flow rate and fog droplet size: between 5-50 micron.

These foggers are perfect for fogging disinfectant in aircraft, warehouses, factories, hospitals, churches, commercial buildings, home and schools, etc

Fogger Mains supply

- Fluid Capacity 5-8L
- 220V/50Hz
- 5-50 Micron particle
- Weight 3.2-3.9kg (tank empty)
- 3 stock items

Fogger E

Mains Supply With Auto Spray Timer

- Fluid capacity 2.5L
- Perfect atomization, flow rate 0-18L/h
- Adjustable flow rate and fog droplet control: 5-50 microns of fine fog droplet
- Can choose retractable cord easy pull out and wind up

Fogger – Battery Portable

Ideal For Aviation and Professional Cleaning/Pest Control Contractors

- Fluid capacity 2.5L
- Battery running time 45min
- 5-50 Micron Droplet Size Adjustable
- Auto Spray Timer
- Weight 5.7 kg (tank empty)

Fogger Pioneer – Battery Portable

Most Powerful for Aviation and Professional Cleaning/Pest Control Contractors

- Backpack design
- Best atomization, Powerful flow rate 0-18L/h
- Covers an area of 200 m² in less than 1 minute.
- 5-50µm adjustable, uniform and consistent coverage
- Precision flow rate and droplet control, for both ULV and residual spraying
- Motor RPM adjustable, set spray distance to 10-15m
- Lithium Battery 24V, 450W
- Battery running time 90 min at low speed and 60 min at high speed
- Fluid Tank Capacity: 5L
- Weight 12.8kg (tank empty)

2nd Generation Pioneer
