

TOOL MATE 971

Synthetic cutting fluid

- Description** Tool Mate 971 is a synthetic cutting fluid for ferrous and non ferrous metals.
It ensures a longer sump life, excellent resistance to microbial growth, easier tramp oil removal when compared to mineral oil based products.
- Application** Tool Mate 971 is designed for cutting, sawing, turning, milling, drilling and finishing. It is highly recommended for finishing in automotive industry.
- Features** Long sump life, high resistance to bacterial growth
Transparent Green Solution
Superior Surface finish
Highly recommended for aluminium alloy
Non toxic, non hazardous,
biodegradable
Rejects tramp oil
Pleasant odour

Typical Properties

Properties	Unit	Standard	Data
Appearance	Visual	Visual	Clear, green
Viscosity @ 40°C	cSt	DIN 51562	8 (5% solution)
		DIN 51757	
Density @ 20°C	g/ml	ASTM D 1298	1.102@15°C
Flashpoint COC	°C	ISO 2592	None

- Storage** Keep container closed, prevent exposure to frost
Prevent water ingress
Store in cool, dry conditions.
Avoid direct sunlight
